

Baby Bottle is link to Care Net

Thank you from Care Net Pregnancy Center to all those who gave through our Baby Bottle Campaign. Over \$53,000 has been raised through this campaign in 2008 to bring help, hope and healing to women and men facing an unplanned pregnancy or sexual health concern.

This campaign, held in over 50 churches of many denominations this year, is normally seen as an important fundraiser for Care Net's ministries and a great connection with area churches. Additionally this June, however, a baby bottle was the crucial link between a woman struggling with what to do as a result of her unplanned pregnancy and Care Net's services.

Kerri* came to us in a very difficult situation, wondering if abortion was her only option and trying to make a decision the week before the rate for her abortion would go up.

While she was visiting a home, Kerri saw one of Care Net's Baby Bottles. She saw Care Net's toll-free number and punched the 1-800 number printed on the outside of the baby bottle into her cell phone. Later that day, she called the number and came to see us the same afternoon, met with one of Care Net's nurses and viewed the gift of life inside her womb via ultrasound. She left still unsure of what to do but very grateful for the help and counsel she received.

Care Net thanks all the churches and individuals who have participated this year. We are also thankful the Lord used this year's efforts to put us in touch with Kerri.
